**Latinos in Libraries, Museums, and Archives**-Patricia Montiel-Overall 2015-12-17

Written by three experienced LIS professionals, Latinos in Libraries, Museums, and Archives demonstrates the meaning of cultural competence in the everyday work in libraries, archives, museums, and special collections with Latino populations. The authors focus on their areas of expertise including academic, school, public libraries, health sciences, archives, and special collections to show the importance of understanding how cultural competence effects the day-to-day communication, relationship building, and information provision with Latinos. They acknowledge the role of both tacit and explicit knowledge in their work, and discuss ways in which cultural competence is integral to successful delivery of services to, communication with, and relationship building with Latino communities.

**Library and Information Science**-Michael F. Bemis 2014

This unique annotated bibliography is a complete, up-to-date guide to sources of information on library science, covering recent books,
monographs, periodicals and websites, and selected works of historical importance. In addition to compiling an invaluable list of sources, Bemis digs deeper, examining the strengths and weaknesses of key works. A boon to researchers and practitioners alike, this bibliography includes coverage of subjects as diverse and vital as the history of librarianship, its development as a profession, the ethics of information science, cataloging, reference work, and library architecture. Encompasses encyclopedias, dictionaries, directories, photographic surveys, statistical publications, and numerous electronic sources, all categorized by subject. Offers appendixes detailing leading professional organizations and publishers of library and information science literature. This comprehensive bibliography of English-language resources on librarianship, the only one of its kind, will prove invaluable to scholars, students, and anyone working in the field.

**Pop Goes the Library** - Sophie Brookover, 2008 Discusses how pop culture can be used to connect with a wider audience at libraries through images, events, collection development, outreach, information technology, and programming.

Welcome to the Real World-Lauren Berger 2014-04-22 The essential book every workplace novice needs—a smart, practical, and fun guide to help them navigate the minefield of personalities, learn to work with their boss, identify priorities, and ultimately kick but at their first job. It’s a challenging time to be young and new in the workplace. Your parents can’t help—the rules have all changed, and faster than guide books can keep up. In Welcome to the Real World, career expert and entrepreneur Lauren Berger arms a new generation of workers like you with the tools you need to succeed. She feels your pain. She’s been in your shoes. Just a few years ago, she was you. In a world defined by uncertainty, she argues you need to be bold, take risks, and understand your value. She shows you how to think of your job as a link that will eventually connect you to the opportunity of your dreams. It’s time to get comfortable getting uncomfortable, she advises. Her essential handbook tells you everything you should know to make the most of your first on-the-job experience,
including how to: Think about “The Big Picture” Deal with rejection Effectively manage your time Navigate “sticky situations” in the office and communicate with different personality types Embrace entrepreneurship regardless of position, rank, or title Organize your financial situation and personal life Get promoted and (one day) take your boss’ job!

**Once Upon a Cuento**-Jamie Campbell Naidoo 2016-05 It is imperative that library programs reflect the rich diversity of the entire community. That includes Spanish-speaking children, who need opportunities to hear their home and school languages spoken, and to see their lives validated through engaging cuentos (stories) that reflect their cultural experiences. Additionally, when combined with other forms of targeted outreach, offering bilingual storytimes in English and
Spanish is an effective strategy to attract Latino and Spanish-speaking families to your library. This all-in-one resource, written by two experienced specialists who understand the nuances of library services, collections, and outreach to this population, shows you how. Suitable for libraries just getting started as well as those with programs already in place, this guide discusses the importance of bilingual programming in the lives of Latino and Spanish-speaking children, addressing the unique educational and informational needs of bilingual children; provides 18 ready-to-use program plans for bilingual storytimes, suitable even for storytime leaders who don't speak Spanish; includes several templates for designing bilingual storytimes, arranged by specific age groups; recommends numerous children's books, songs, and professional resources to assist librarians as they plan their bilingual programs; explores the opportunity for digital media usage in storytimes for Latino and Spanish-speaking families, with examples of apps that can help meet the multiple literacy needs of bilingual children; and suggests ways to perform outreach to Spanish-speaking and Latino communities, emphasizing the importance of relationship-building and community collaboration.

Enhanced with interviews and advice from experts affiliated with REFORMA (The National Association to Promote Library and Information Services to Latinos and the Spanish-Speaking), this book will become a trusted resource for children's librarians, school library media specialists, outreach and programming librarians, ESL educators, teachers, and professionals in child-care agencies.

Welcome to the Universe-Neil deGrasse Tyson 2016-09-12 The New York Times bestselling tour of the cosmos from three of today's leading astrophysicists Welcome to the Universe is a personal
guided tour of the cosmos by three of today's leading astrophysicists. Inspired by the enormously popular introductory astronomy course that Neil deGrasse Tyson, Michael A. Strauss, and J. Richard Gott taught together at Princeton, this book covers it all—from planets, stars, and galaxies to black holes, wormholes, and time travel. Describing the latest discoveries in astrophysics, the informative and entertaining narrative propels you from our home solar system to the outermost frontiers of space. How do stars live and die? Why did Pluto lose its planetary status? What are the prospects of intelligent life elsewhere in the universe? How did the universe begin? Why is it expanding and why is its expansion accelerating? Is our universe alone or part of an infinite multiverse? Answering these and many other questions, the authors open your eyes to the wonders of the cosmos, sharing their knowledge of how the universe works. Breathtaking in scope and stunningly illustrated throughout, Welcome to the Universe is for those who hunger for insights into our evolving universe that only world-class astrophysicists can provide.

**Blogdown**-Yihui Xie 2017-12-12 blogdown: Creating Websites with R Markdown provides a practical guide for creating websites using the blogdown package in R. In this book, we show you how to use dynamic R Markdown documents to build static websites featuring R code (or other programming languages) with automatically rendered output such as graphics, tables, analysis results, and HTML widgets. The blogdown package is also suitable for technical writing with elements such as citations, footnotes, and LaTeX math. This makes blogdown an ideal platform for any website designed to communicate information about data science, data analysis, data visualization, or R programming. Note that blogdown is not just for blogging or sites about R; it can also be used to create general-
purpose websites. By default, blogdown uses Hugo, a popular open-source static website generator, which provides a fast and flexible way to build your site content to be shared online. Other website generators like Jekyll and Hexo are also supported. In this book, you will learn how to: Build a website using the blogdown package; Create blog posts and other website content as dynamic documents that can be easily edited and updated; Customize Hugo templates to suit your site's needs; Publish your website online; Migrate your existing websites to blogdown and Hugo.

Yihui Xie is a software engineer at RStudio. He has authored and co-authored several R packages, including knitr, rmarkdown, bookdown, blogdown, shiny, xaringan, and animation. He has published two other books, Dynamic Documents with R and knitr and bookdown: Authoring Books and Technical Documents with R Markdown. Amber Thomas is a data journalist and "maker" at the online publication of visual essays: The Pudding (https://pudding.cool). Her educational background was marine biology, but she has a strong love of data analysis, visualization, and storytelling. Alison Presmanes Hill is an Associate Professor of Pediatrics at Oregon Health & Science University, where she teaches Computer Science courses on data analysis, data science, and visualization. Her research focuses on using computational methods to study the development of children with neurodevelopmental disorders, in particular Autism Spectrum Disorders.

**Stop Walking on Eggshells**-Paul T. Mason (M.S.) 2009-09-17 People with Borderline Personality Disorder (BPD) challenge those close to them with their often bewildering mood shifts and unpredictable behavior. For those people who have relationships with persons with BPD, whether they be relatives, friends, spouses, parents, or children, this book should prove a godsend. It delineates the ways in which borderline individuals' (BPs) behavior and communications frustrate and perplex those around them but goes further in articulating specific strategies that those close to the person with Borderline Personality Disorder (non-BPs, as they are termed in this book) can effectively cope with these kinds of behaviors. ----Larry J.
